SAFETY, WARNINGS, AND OPERATION

- Please ensure that the installer and end-user of this product have familiarized themselves with the contents in this manual. This manual provides important information about the possible safety and operation risks that are involved with the usage of this product.
- Our number one concern is the safety of our customers. This product is intended to be installed by a professional to minimize risk of an improper installation. Improper installations can lead to product damage, vehicle damage, and bodily injury. We ask that you reach out for professional assistance if this installation is beyond your capabilities.
- Please ensure to safeguard this installation and operation manual to reference in the future or to pass on to a future owner of the product.
- Please follow all instructions and take all safety precautions necessary throughout the entirety of the installation process.

PARTS AND TOOLS REQUIRED

SYMBOL	DESCRIPTION	TOOL	DESCRIPTION
	HAZARDOUS WARNING		RATCHET/SOCKET WRENCH
	WARNING: SHARP ELEMENTS		SOCKETS : 13mm
	WARNING: CRUSHING OF HANDS		13mm
	WARNING: HOT SURFACE		(Allen wrench included)
	MANDATORY: WEAR EYE PROTECTION		EYE PROTECTION

PARTS AND TOOLS REQUIRED

Hardware Kit includes:

- (1). Qty x 16 = M8 x 35mm Hex Countersunk Head Bolts
- (2). Qty x 16 = M8 Finish Washers
- (3). Qty x 34 = M8 Nylock Nuts
- (4). Qty x 34 = M8 x 24 x 2mm Flat Washers
- (5). Qty x 18 = M8 Plastic Retainers
- (7). Allen Wrench included

Components List:

- (a). Side Bars - Qty x 2
1 Driver / 1 Passenger
- (b). Front/Middle/Rear Brackets - Qty x 6
3 Driver /3 Passenger (100540)
- (c). Hoop Steps (bolt on) - Qty x 4
2 Driver / 2 Passenger (100524)

ICI STEP INSTALLATION

Step 1 (Prep)

Beginning on the Driver's side, remove any steps if equipped. Next, locate the 3 sets of mounting points on the underside of the vehicle (Fig. 1). Underneath the rocker panel, there are three bracket locations, each location has three OE Factory bolts protruding out.

Figure 1.

Step 2 (Install Brackets to Truck)

Begin with the driver front bracket 100540. You will need (3 sets) of M8 nylock nuts and M8 flat washers. Use a 13mm socket and do not fully tighten yet. Once the front bracket is attached, move on to the middle and rear brackets, repeating the steps above for each bracket.

Figure 2.

Step 3 (Hang bar on Brackets)

Next, locate the driver side bar. The front tip of each bar is sloped down to follow curve of door. Reference diagram on page 3. The top of the bar has a small lip, use the lip to hang the bar on the brackets. This will make the installation process easier and hands-free.

Figure 3.

ICI STEP INSTALLATION

Step 4 (Bolt Front Bracket to Bar)

Start by bolting the front bracket to the bar. It is the 1st bolt hole from the front. You will need (2 sets) of M8 nylock nuts, M8x35mm hex countersunk bolts, M8 flat washers, and M8 finish washers. Use a 13mm wrench and the provided Allen wrench. Do not fully tighten until all brackets and steps have been attached.

Figure 4.

Step 5 (Bolt Middle Bracket to Bar and Front Hoop Step)

Next, bolt the middle bracket to the bar and front hoop step. Note that the bracket and hoop step share a bolt. You will need (3 sets) of M8 nylock nuts, M8x35mm hex countersunk bolts, M8 flat washers, and M8 finish washers. Use a 13mm wrench and the provided Allen wrench. Reference diagram on page 3. Do not fully tighten yet.

Figure 5.

Step 6 (Bolt Rear Bracket to Bar and Rear Hoop Step)

Then, bolt the rear bracket to the bar and rear hoop step. Note that the bracket and hoop step share a bolt. You will need (3 sets) of M8 nylock nuts, M8x35mm hex countersunk bolts, M8 flat washers, and M8 finish washers. Use a 13mm wrench and the provided Allen wrench. Reference diagram on page 3. Do not fully tighten yet.

ICI STEP INSTALLATION

Figure 7.

STEP 7 (Tighten Brackets to Truck)

Make sure all 3 brackets are loosely fit to the vehicle and bar. Using a 13mm socket, fully tighten the front bracket to the vehicle. Make sure the bracket is flush with the mounting surface. Repeat on the middle and rear brackets, checking the bracket alignment as needed. Leave bar loose for now.

STEP 8 (Tighten Brackets to the Bar)

Once the 3 brackets are fully tightened to the truck, adjust the bar from front to back and tighten the bar to the brackets with a 13mm socket and provided Allen wrench. Make sure the bar is flush with the front and bottom face of the brackets as you are tightening them. Then, tighten the Hoop Steps to the bar.

Figure 8.

STEP 9 (Finish)

Check all hardware and make sure they are fully tightened. Reference diagram on page 3 for hardware locations. Repeat Steps 1-9 for the Passenger Side.

***PROTIP:** When tightening the Finish Washers, hold the Allen Key tight so the Bolt does not spin. Then, tighten the Nut on the backside. This will prevent the Bolt and Finish Washer from spinning and scratching the Bar.
